The second Edition of a small Vocabulary, English and Malay, being expended, it was deemed desirable to publish another, to which the Bugis is now added.

The Bugis part of the work has been lying by in *M. S. S.* for several years, and it would perhaps not have appeared in print now, but, for the kind offer of a friend to contribute Thirty Dollars towards printing it; and in the hope that a sufficient number may be sold to pay the Press, and at the same time, give the Public some idea of a language hitherto almost unknown it is now published, together with an Alphabet of the language.

The Malay, and next to that, the Bugis, are the two principal spoken languages in these parts. With a knowledge of these two, a person may hold intercourse with the different Tribes who occupy the Sea Coasts on all the Islands of the Indian Archipelago.

The pronunciation is given in Roman Characters, as near as it is possible to convey the sounds of Indian words; according to a scheme of orthography added here.

The principal words are collected under separate heads, so that the reader has only to make himself acquainted with the contents placed at the end of the book, and he will be able as easily to find a word under the subject to which it belongs, as under the letter with which the word commences

The Adjectives and Verbs, being more numerous than any other class of words have, for that reason, been put in Alphabetical order.
